

## Neil Wright

### Senior Archaeological Consultant

BSc (Hons) MClfA

Neil has over fourteen years experience in the professional heritage sector, with over eight years spent in field archaeology and six in consultancy. He has experience of major infrastructure projects, such as the new nuclear build at Hinkley Point, and his major clients have included National Grid, SSE and EDF Energy. Having worked on many and varied projects, Neil has built-up substantial knowledge of the heritage sector within the UK, both practically and in a management and consultancy role.

### Experience

Neil has extensive experience of the heritage sector within the UK. In the field, he has directed large complex excavations on nationally important sites of a broad range of type and period. Whilst working for local authority and private companies, he has built up a considerable portfolio of fieldwork projects.

As a consultant Neil is used to working with project teams on large infrastructure projects, acting as the archaeological lead for clients such as EDF Energy and National Grid.

Whilst working for AMEC's framework project with National Grid he took the lead in archaeology and cultural heritage. This enabled Neil to enhance the historic environment aspects, which led him to managing a small team of consultants on National Grid's refurbishment projects in the west of England and Wales.

As part of the New Nuclear Build at Hinkley Point C Neil successfully consulted with local and national regulatory bodies and managed the archaeological sub-contractors on the main site and associated developments. He was also involved in the early stages of Sizewell C.

### Key Projects

#### **Hinkley Point New Nuclear Build EDF Energy**

Consulted on and managed all archaeological works on the main new site and associated developments.

#### **Beaulieu-Denny Overhead Electricity Line SSE**

Managed and carried-out all archaeological works for underground cable diversions.

#### **Electricity Alliance Framework (West)**

##### **National Grid**

Archaeological programme manager, project manager and lead consultant for West of England Framework.

#### **Dalgetty Bay Radioactive Waste Remediation AMEC Plc.**

Managed and carried-out all archaeological works as part of AMEC's ground investigations.

#### **Gainsborough Building, Bath Spa The Osbourne Group**

Director of a large, complex urban excavation on an internationally important site.

#### **Field Monument Warden English Heritage**

Seconded from Gloucestershire County Council to carry out Scheduled Monument site inspections, appraisals and management proposals.
