

Sally Dicks

Director

BA (Hons) ClfA

Sally has over 20 years experience working as a field archaeologist, archaeological consultant and heritage professional within the UK and Ireland.

Sally specialises in large scale residential and infrastructure projects and is particularly experienced in navigating complex heritage issues through the DCO process.

She has also project managed archaeological mitigation on a wide variety of sites from urban regeneration to rural residential and from early prehistoric to modern industrial.

Experience

Sally has been with CgMs Archaeology for 13 years and prior to this worked as a consultant at Atkins Heritage and as a field archaeologist with Oxford Archaeology and Bedfordshire County Council Archaeological Unit. Having worked in local authority, commercial archaeology and as an archaeological consultant Sally has a thorough knowledge of British archaeology and the planning system.

Sally is experienced in working as part of large multi-disciplinary teams providing input to masterplans, designing archaeological mitigation and heritage projects and navigating the DCO process.

Recent work includes addressing archaeological implications for a large infrastructure scheme in the East Midlands, which resulted in significant savings in time and costs for the client.

Sally has also been involved with a ridge and furrow project at Prologis at DIRFT III. Historic England has used the project as an example of innovative design at conferences in the UK and Lithuania. Sally is working with Prologis's consultant team to promote DIRFT III as an example of best practice to CEEQUAL Outstanding Achievement Awards.

Sally is a long standing member of the Chartered Institute for Archaeologists (ClfA) with interests in promoting community involvement in archaeological projects. Sally works alongside a large dedicated team of consultants and is supported by researchers and professional staff.

Key Projects
