

## **Paul Clark**

**Associate Director, Archaeology**  
BA MCIfA

Paul has more than 15 years' professional experience and is currently responsible for advising clients on all aspects of archaeology during the planning and development process. This includes everything from preparing desk-based assessments, negotiating with LPAs to agreeing schemes of archaeological work, and commissioning and managing fieldwork.

### Experience

Paul has a strong fieldwork background, excavating and latterly directing sites across the country, but with a north-west focus. He has directed extensive fieldwork programmes on a number of major infrastructure projects - including an internationally important Mesolithic site in Cumbria. As a result he is fully aware of the practicalities of successfully undertaking large-scale excavation projects on time and within budget.

Paul also has extensive experience in preparing Desk-Based Assessments, managing evaluation and mitigation fieldwork and ensuring fieldwork reports are produced to a high standard. He is proficient in designing programmes of field work, and writing project designs. He is used to working as part of multi-disciplinary teams, and has contributed to Environmental Statements for major schemes.

Paul is currently advising a range of clients, predominantly residential, across a variety of development projects, ensuring that archaeology is dealt with in a proportionate and timely manner. Recent projects have included large logistics schemes in Didcot and Hemel Hempstead, residential schemes across the East Midlands and beyond, and investigations ahead of school redevelopment in Cambridgeshire.

### Key Projects

**Edison Bell Way, Huntingdon**  
**Churchill Retirement Living**  
Management of Medieval excavation and negotiation to ensure preservation of archaeology across half of site

**Didcot Road, Long Wittenham**  
**Cerda Planning**  
Pre-planning advice and input, including information to Historic England to ensure site was not Scheduled

**London Road, Great Glen**  
**Davidsons Developments**  
Managed project from initial appraisal through evaluation and subsequent mitigation excavation

**Towcester South**  
**Persimmon Homes**  
Management of fieldwork required by large scale extension to town

**Rudham Stile Lane, Fakenham**  
**Trinity College Cambridge**  
Production of ES Chapter and management of baseline studies for large allocated site

**Maylands Gateway, Hemel Hempstead**  
**Prologis**  
Providing advice and overseeing fieldwork for a large development of distribution warehouses
