

Peter Reeves

Associate Director

BA (Jt Hons – Archaeology/Geology), MCIfA

Peter has experience in consulting on a wide variety of sites ranging in size, complexity, geography and archaeological potential. He has a particular expertise in the Mining, Minerals and Energy sectors experienced in producing desk-based assessments, environmental statements and setting assessments, and in managing fieldwork projects. Peter works for a variety of developers, including major residential developers and renewable energy companies.

Experience

In his career, Peter has provided archaeological advice to clients on a wide range of linear infrastructure projects, including projects in sensitive areas. Having worked internationally and throughout the UK, Peter has extensive experience of delivering projects in the South of England making him ideally placed to form part of the team for New Forest and Dorset.

Peter has an excellent and wide-ranging understanding of the policy and guidance regarding historic environment across all parts of the UK. He has considerable experience in the preparation of input into Environmental Statements for major schemes including reviews of regional mineral consents.

Peter was the lead consultant for cultural heritage for the Blandford Forum to Portland Bill gas pipeline and underground storage site in Dorset which passed through a county 80% of which comprises AONB. Peter undertook similar works with regard to an oil pipeline passing through Hertfordshire.

Peter's other experience includes project managing the implementation of a programme of rolling survey for all 126 properties in care within the jurisdiction of Historic England's South West Region, of which Dorset forms part.

Peter was the lead consultant for cultural heritage for Lymington PFI Hospital, New Forest, Hampshire. The project involved successful application despite the presence of an adjacent Scheduled Monument and the master planning was recognised for utilisation of existing historic buildings and its 'green' construction.

Key Projects

Lymington PFI Hospital, New Forest

Production of a DBA, with Setting Assessment and ES chapter for a commercial scheme which potentially impacted on a Scheduled hillfort.

Blandford Forum to Portland Bill Gas Pipeline, Dorset

Insert 6 key projects with a short description of around three to four lines

Hook, Hampshire

Consultancy work including the production of a DBA, to develop and manage a mitigation strategy to identify and deal with the industrial and earlier archaeology present on site, for the undergrounding of 10KV cables.

Surrey Hills AONB, Surrey

Research for location of test drilling wells, including detailed research into specific camouflaging structures and buildings within an area of outstanding natural beauty.

Petrofina Pipeline, Hertfordshire

Research for location of pipe route, production of ES Chapters and management of subsequent archaeological mitigation.
