

## Richard von Kalinowski-Meager

### Director

BA MA PG Cert FSA MifA

Richard provides commercially focussed archaeological and heritage services to a wide range of clients for major development sites throughout London and across Southern England.

### Experience

Richard provides robust and commercially aware archaeological and heritage support and advice, enabling development projects to successfully and smoothly progress through the planning system and subsequently on to completion on site.

At the pre-planning stage Richard's work includes the quantification of archaeological and heritage potential and significance through the production of desk based assessments, including Impact Assessments, Environmental Impact Assessments and Environmental Statements.

In addition Richard co-ordinates and manages a wide range of fieldwork projects, including archaeological monitoring, evaluation and excavation, together with historic building recording, from inception through to completion.

This includes liaison between curators, contractors and clients in order to achieve the best result for the development and the identified archaeological resource. Commencing with the costing of projects, Richard oversees all aspects of fieldwork, including the production of Specifications and Written Schemes of Investigation, together with all relevant aspects of site works and post excavation assessment reporting works, obtaining confirmation from curators that development work can progress and that planning conditions can be discharged.

#### Qualifications:

BA (Hons) - Archaeology

MA - Archaeology & Heritage

PG Cert - Historic Conservation

FSA - Fellow of the Society of Antiquaries

MCI fA - Member of the Chartered Institute for Archaeologists

Affiliate Member of the Institute of Historic Building Conservation (IHBC)

### Key Projects

#### Royal Mint Court

Working with Delancey and GVA Second London Wall to deliver the redevelopment of this major commercial site in Tower Hamlets, immediately adjacent to the City of London and the Tower of London, and containing the remains of St Mary Graces Priory together with one of two Medieval Black Death Cemeteries in London.

#### Battersea Power Station

Working with the Battersea Power Station Development Company, Turner & Townsend and Skanska to discharge the archaeological planning conditions attached to each phase of the Power Station's redevelopment by co-ordinating suitable archaeological mitigation measures.

#### Severalls Hospital Colchester Essex

Working with a consortium team including Bellway Homes, Bloor Homes and Taylor Wimpey for this large scale redevelopment, including the co-ordination of historic building recording together with elements of below ground archaeological works to progress condition discharge.

#### London Wall & Moorgate

Providing archaeological advice ahead of the redevelopment of a site at the corner of London Wall and Moorgate in the City of London.
