keeping station open while new concourse is constructed

project managing whole planning process

understanding complex railway operational issues

ES required

Planning Performance Agreement

Provision of new station to enable the Thameslink Programme to be finally realised and completed. New track and platform arrangements requiring new railway viaduct to provide more through trains and fewer terminating trains.

CgMs is providing a full planning project management role including liaising with English Heritage, GLA, TfL and of course LB Southwark.

CgMs is providing heritage advice to support the planning, listed building and conservation area consent applications.

CgMs is part of the Network Rail Planning Steering Group which co-ordinates, manages and delivers the planning process for the new station.
